

FABRICS

TECHNICAL INFORMATION

COMPOSITION & APPEARANCE

A fabric is not completely 'stable'. Even though every effort is made to avoid distortions, a commercial tolerance is to be expected. Pattern repeats and product widths shown in this price list or in our sample books are accurate to (+/-) 5%. We strongly suggest that before the fabric is cut, the pattern alignment is checked to ensure a satisfactory result is obtainable.

Whilst every care has been taken to ensure accuracy of the composition shown in this price list, please note that a fibre tolerance of 3% between actual and quoted percentage is possible.

When held against the light, fabrics cannot be guaranteed to be free of visible flaws.

MATCHING

Due to the unique nature of natural fibres, subtle dye and texture variations may occur. Although every effort is made to achieve the closest possible colour match, we are unable to guarantee exact matching between batches or co-ordinated products. Where an exact match is important, please request a stock cutting and reserve order. We can only hold stock reserves against stock cuttings for two weeks from when the cutting is requested.

A CFA (cut for approval) measures 50 cm length by a roll width and should always be considered when placing orders larger than 5 m/design to guarantee a satisfactory outcome.

USAGE

Always follow our usage recommendation specified on each fabric.

SHRINKAGE AND AFTERCARE

The possibility of fabric shrinkage should always be considered when making curtains, loose covers, etc. An allowance of at least 5% in the header or hem is recommended for curtains.

We recommend loose covers are made with an allowance of 5% against the possibility of shrinkage in washing or dry cleaning.

Always follow the appropriate cleaning instructions.

LIGHT EXPOSURE

Eventually, most dyes fade on exposure to light, the main cause being sunlight. Colour failure can occur rapidly on exposed areas. Glass magnifies the destructive elements of sunrays and it should be noted that winter sun is as harmful as summer sun. Artificial light can also cause fading.

However, the use of nets/blinds/sheers can be made to act as a barrier and protect your curtains from these harmful effects. When it comes to window treatments, we would always advise using lining or interlining.

If possible, upholstered furniture should be kept out of direct sunlight to prevent premature fading.

Failure to protect the fabric may result in claims of fading being rejected.

Please note none of our fabrics are guaranteed against fading, but some fabrics are more susceptible to light degradation than others.

Impurities in the air may cause as much fading as the effects of the sun and colours can fade from oxidation too.

VELVETS

Velvets are supplied on rolls which should not be stored on end as permanent creasing can result.

All velvets are delicate fabrics and the pile can be flattened or marked during transit, make-up and use. This distortion of the pile is a normal characteristic of this type of fabric and is not a fabric fault or an indication of poor wear. This movement of the pile is to be expected, especially in areas of higher contact. Care must be taken not to spill liquids onto velvet cloth as staining may occur; this is very difficult to remove.

Do not upholster velvet directly over foam fillings. An interliner should be used. This will ensure the fabric lasts longer and minimises pile loss.

Pile can be restored by a light brushing in all directions. Light pile marking is quite normal, but humidity and body heat can 'set' the fibres of the pile and brushing alone may not restore the pile.

In these instances, a light steaming together with brushing will restore the pile.

No claims will be accepted for marking, pressure marks or watermarking.

WASHING & CLEANING

Always follow the washing and cleaning guidelines as instructed on each specific fabric.

FLAME PROOFING / OIL & SOIL REPELLANCY TREATMENT

Please refer to the price list for details of FR specifications.

Where an enhanced level of FR performance is required for either contract or domestic, we can arrange for our fabrics to be treated as follows:

Domestic upholstery	BS5852: Part 1	€ 4.40
Contract curtains	BS5867: Part 2: Type B	€ 4.40
Contract upholstery	BS5852: Part 2: Crib 5	€ 4.90
Soil and stain repellancy	in-house standards	€ 4.20
Other FR Global standards	EN 13501 (M1)	€ 7.50
	DIN 4102 (B1)	
	EN 13773 (curtains)	
	SN 198898 (Switzerland)	
	USA - NFPA 260, 701	
	USA - ASTM E 84	
*For velvet quality fabrics prices increase with € 1 per metre, excl. VAT		

Prices are per metre, excluding VAT.

Prices shown are for fabrics up to 150cm in width. Over 150cm prices increase pro rata.

Maximum treatment width is 300cm.

MINIMUM ORDER QTY 5m PER PRODUCT.

MINIMUM TREATMENT VALUE € 40 excluding VAT.

Standard lead time is 10 working days from order confirmation date.

****For made-up curtains please contact us****

IMPORTANT NOTICE

Fabrics may shrink after treatments between 3-5%. To make sure every treatment satisfies the necessary standard, 0.5 m will be tested after FR and Oil & Soil repellency treatments. Therefore, when placing your order, please take these factors into consideration.

FR TREATMENT INFORMATION

We cannot accept any liability for any changes in the appearance, performance or quality of our fabrics which have been subjected to any kind of treatment or processing after purchase including flame-proofing and stain repellent treatment.

All orders must be in writing with clear instructions of which treatment is required and of any specifications to be met. When ordering fabric to be treated, please add 5% extra to allow for shrinkage / testing during processing.

We offer a fabric processing service to meet many different standards, but certain qualities and colourways are not suitable for all treatments.

CUSTOM-MADE PRINTED FABRICS

Upon request, we are able to create customized printed textiles suitable for drapes, upholstery, cushion or loose covers, and small furnishing pieces by using various designs from our exclusive pattern collections.

Please review the price list below (RRP), considering our available base cloths:

Printing material	Price / lm
100% linen	€ 225.00
100% cotton	€ 145.00
50% linen + 50% cotton	€ 225.00
100% cotton velvet	€ 275.00
100% polyester (outdoor)	€ 145.00
100% polyester (FR), lightweight	€ 230.00
100% polyester (FR), heavyweight	€ 250.00

Prices are per metre, excluding VAT.

Prices shown are for 100m per design / colour; single-width fabrics.

For every 10 m less, prices increase by 5%.

MINIMUM ORDER QTY 50m PER PRODUCT, for which prices increase 25%.

A submit sample can be provided upon request.

Standard lead time is 8 weeks from Order Acknowledgement.

DESIGN & SUPPLY

DISCLAIMER

FAULTY OR INCORRECT GOODS

Please inspect carefully all fabrics prior to cutting. Every effort is made to ensure that you receive fabric in the best possible condition. However, errors can be made and damage and creasing can occur in transit. It is therefore essential that no length is cut until you are totally satisfied in all respects that the fabric is the correct design and colourway and it is in an acceptable condition.

No liability will be accepted for changes in appearance, performance or defects in any of our fabrics if they are treated after purchase by spraying or processing of any kind, including flame proofing or the application of stain repelling treatments.

Please note that gradual fading, pilling, stretching and colour transfer may occur naturally over time and are part of normal wear and tear. These characteristics do not constitute faults in the fabric or craftsmanship.

We recommend that you follow the care instructions provided on our website to maintain the quality of your purchase.

Avoid overexposure to harsh chemicals, sunlight and rough surfaces to minimize the risk of damage.

In addition, always follow the international specific care guidelines for different types of fabrics (e.g., cotton, velvet, linen) to ensure proper care.

Our company shall not be liable for delays caused by issues related to carriage or inaccurate contact information.

RETURNS

Faulty goods or goods sent in error to be returned should be organised through our Customer Service department within 30 days of invoice. For goods returned outside of this period, Customer Services will arrange inspection, and the decision of replacement, repair or refund will be at our discretion.

It is not our policy to accept unauthorised returns. In the event that a return is received without prior authorisation, the customer will incur a 30% handling charge plus any associated carriage costs.

For goods returned as faulty that, on inspection, no fault is found, we reserve the right to charge a handling charge, plus any associated carriage fee.

Goods cannot be returned for credit once cut or treated. Customer Service will advise if the goods will be collected or whether samples, labels or images will be required for evidence of claim. We would ask this is provided to us within 14 days and proof of posting is obtained.

All goods must be retained until a credit note is issued. We cannot issue credits unless the return has been agreed and delivered to our warehouse within 14 days of receipt of the authorised returns paperwork. All returns must be returned in their original packaging as damaged returns will not be accepted for credit. Postage and packaging will not be credited for unauthorised returns.

Where goods are delivered to a third party, we recommend a stock cutting is sent prior to confirm the correct product and reserve the order.

It is the responsibility of the retailer to ensure customers are aware of our returns policy at time of ordering.
